DETAILED ACTION

This Office Action is in response to Applicant's amendment filed 20 May 2008.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claim 34-36 is rejected under 35 U.S.C. 102(b) as being anticipated by
Khairkhahan et al. (US Patent 7,044,134).**

Khairkhahan'134 discloses that an axially movable core (340), an implant (304), and a slider assembly containing a guide tube (320; shown but unlabeled in Figure 19, but its equivalent is labeled in Figure 17) and a nut (346) releasably connected to the core (Figure 19). The guide tube contains a slot (322). The nut includes a flange (324) that extends to the slot (Figure 19). Khairkhahan'134 does not teach that the nut is slidably received within the guide tube, however, since Khairkhahan'134 teaches that the device is made of a flexible material, the device is capable of being flexed so that the nut can reach the slot and slide into it.
